Introduction

About this report

This benchmark report for Royal Berkshire NHS Foundation Trust contains results for the 2025 NHS Staff Survey, and historical results back to 2021 where possible. These results are presented in the context of best, average and worst results for similar organisations where appropriate. Data in this report are weighted to allow for fair comparisons between organisations.

Results for Q1, Q10a, Q26d, Q27a-c, Q28, Q29, Q30, Q31a, Q32a-b, Q33, Q34, Q35 , Q36, Q37, Q38, Q39a-b and Q40 are not weighted or benchmarked because these questions ask for demographic or factual information.

How results are reported

For the 2021 survey onwards the questions in the NHS Staff Survey are aligned to the [People Promise](#). This sets out, in the words of NHS staff, the things that would most improve their working experience, and is made up of seven elements:

In support of this, the results of the NHS Staff Survey are measured against the seven People Promise elements and against two themes (Staff Engagement and Morale). The reporting also includes sub-scores, which feed into the People Promise elements and themes. The next slide shows how the People Promise elements, themes and sub scores are related and mapped to individual survey questions.

People Promise elements, themes and sub-scores

People Promise elements	Sub-scores	Questions
We are compassionate and inclusive	Compassionate culture	Q6a, Q25a, Q25b, Q25c, Q25d
	Compassionate leadership	Q9f, Q9g, Q9h, Q9i
	Diversity and equality	Q15*, Q16a, Q16b, Q21 *Due to changes in the Q15 question wording in 2025, Q15 is not included in the score calculation for this theme or sub-score.
	Inclusion	Q7h, Q7i, Q8b, Q8c

Questions not linked to the People Promise elements or themes

Introduction

This section provides a brief introduction to the report, including how questions map to the People Promise elements, the themes and sub-scores, as well as features of the charts used throughout.

Organisation details

This slide contains **key information** about the NHS organisations participating in this survey and details for your own organisation, such as response rate.

People Promise elements, themes and sub-scores: Overview

This section provides a high-level **overview** of the results for the seven elements of the People Promise and the two themes, followed by the results for each of the **sub-scores** that feed into these measures.

People Promise elements, themes and sub-scores: Trends

This section provides trend results for the seven elements of the People Promise and the two themes, followed by the trend results for each of the sub-scores that feed into these measures.

All the People Promise elements, themes and sub-scores are scored on a 0-10 scale, where a higher score is more positive than a lower score. For example, with the Burnout sub-score, a higher score (closer to 10) means a lower proportion of staff are experiencing burnout from their work. These scores are created by scoring questions linked to these areas of experience and grouping these results together. Your organisation results are benchmarked against the benchmarking group average, the best scoring organisation and the worst scoring organisation. These charts are reported as percentages. The meaning of the value is outlined along the y axis. The questions that feed into each sub-score are detailed on slide 5.

Note: where there are fewer than 10 responses for a question, this data is not shown to protect the confidentiality of staff and reliability of results.

People Promise elements, themes and sub-scores: Questions

This section provides trend results for **questions**. The questions are presented in sections for each of the People Promise elements and themes.

Not all questions reported within the section for a People Promise element or theme feed into the score and sub-scores for that element or theme. The first slide in the section for each People Promise element or theme lists which of the questions that are included in the section feed into the score and sub-scores, and which do not.

Questions not linked to People Promise

Results for the questions that are not related to any People Promise element or theme and do not contribute to the scores and sub-scores are included in this section.

Workforce Equality Standards

This section shows that data required for the indicators used in the **Workforce Race Equality Standard (WRES)** and the **Workforce Disability Equality Standard (WDES)**.

About your respondents

This section provides details of the staff responding to the survey, including their **demographic and other classification questions**. It also includes the socio-economic background questions.

Appendices

Here you will find:

- Response rate.
- Significance testing of the People Promise element and theme results for 2024 vs 2025.
- Tips on action planning and interpreting the results.
- Information about the socio-economic background questions.
- Additional reporting outputs.

Key features

Question-level results are always reported as percentages; the **meaning of the value** is outlined along the axis. Summary measures and sub-scores are always on a 0-10pt scale where 10 is the best score attainable.

Question number and text (or summary measure) specified at the top of each slide.

Note this is example data

Colour coding highlights best / worst results, making it easy to spot questions where a lower percentage is a better or worse result.

'Best result', 'Average result', and 'Worst result' refer to the **benchmarking group's** best, average and worst results.

Number of responses for the organisation for the given question.

Tips on how to read, interpret and use the data are included in the Appendices

Workforce Equality Standards

Note where there are fewer than 10 responses for a question, results are suppressed to protect staff confidentiality and reliability of data.

Workforce Race Equality Standards (WRES)

This section contains data for the organisation required for the NHS Staff Survey indicators used in the Workforce Race Equality Standard (WRES). It includes the 2021-2025 organisation and benchmarking group median results for q13a, q13b&c combined, and q16b split by ethnicity (by white staff / staff from all other ethnic groups combined). Organisation and benchmarking group median results for q15 are included for 2025 only*.

Workforce Disability Equality Standards (WDES)

This section contains data for the organisation required for the NHS Staff Survey metrics used in the Workforce Disability Equality Standard (WDES). It includes the 2021-2025 organisation and benchmarking group median results for q4b, q11e, and q14a-d split by staff with a long lasting health condition or illness compared to staff without a long lasting health condition or illness. Organisation and benchmarking group median results for q15 split by staff with a long lasting health condition or illness compared to staff without a long lasting health condition or illness are shown for 2025 only*. It also shows results for q31b (for staff with a long lasting health condition or illness only), and the staff engagement score for staff with a long lasting health condition or illness, compared to staff without a long lasting health condition or illness and the overall engagement score for the organisation.

In 2022, the text for q31b was updated and the word 'adequate' was changed to 'reasonable'.

The WDES breakdowns are based on the responses to q31a Do you have any physical or mental health conditions or illnesses lasting or expected to last for 12 months or more?

*Due to changes in the question wording in 2025, previous years' results for WRES indicator 7 and WDES metric 5 (Q15) are not reported. For more information, please refer to the *Technical Guide*: <https://www.nhsstaffsurveys.com/survey-documents/>

This section contains data required for the staff survey indicators used in the Workforce Race Equality Standard (WRES) and Workforce Disability Equality Standard (WDES). Data presented in this section are unweighted.

Workforce Race Equality Standards (WRES)

Vertical scales on the following charts vary from slide to slide and this effects how results are displayed. This allows incremental changes and small differences between results for subgroups to be more easily interpreted.

Data shown in the WRES charts are unweighted.

Averages are calculated as the median for the benchmark group.

Note: where there are fewer than 10 responses for a question this data is not shown in the chart to protect the confidentiality of staff and reliability of results.

Vertical scales on the following charts vary from slide to slide and this effects how results are displayed. This allows incremental changes and small differences between results for subgroups to be more easily interpreted.
Data shown in the WDES charts are unweighted.

Note: where there are fewer than 10 responses for a question this data is not shown in the chart to protect the confidentiality of staff and reliability of results.

Appendix C: Tips on using your benchmark report

The following pages include tips on how to read, interpret and use the data in this report. The **suggestions are aimed at users who would like some guidance on how to understand the data** in this report. These suggestions are by no means the only way to analyse or use the data but have been included to aid users.

Key points to note

The seven People Promise elements, the two themes and the sub-scores that feed into them cover key areas of staff experience and present results in these areas in a clear and consistent way. The People Promise elements, themes and sub-scores are scored on a 0-10 scale, where a higher result is more positive than a lower result. These results are created by scoring questions linked to these areas of experience and grouping these results together. Details of how the results are calculated can be found in the Technical Guide available on the [Staff Survey website](#).

A key feature of the reports is that they **provide organisations with up to five years of trend data**. Trend data provides a much more reliable indication of whether the most recent results represent a change from the norm for an organisation than comparing the most recent results only to those from the previous year. Taking a longer-term view will help organisations to identify trends over several years that may have been missed when comparisons are drawn solely between the current and previous year.

People Promise elements, themes and sub-scores are benchmarked so that organisations can make comparisons to their peers on specific areas of staff experience. Question results provide organisations with more granular data that will help them to identify particular areas of concern. The trend data are benchmarked so that organisations can identify how results on each question have changed for themselves and their peers over time by looking at a single chart.

When analysing People Promise element and theme results, it is easiest to start with the **overview** page to quickly identify areas of interest which can then be compared to the best, average, and worst result in the benchmarking group.

It is important to **consider each result within the range of its benchmarking group 'Best result' and 'Worst result'**, rather than comparing People Promise element and theme results to one another. Comparing organisation results to the benchmarking group average is another point of reference.

Areas to improve

- By checking where, the 'Your org' column/value is lower than the benchmarking group 'Average result' you can quickly identify areas for improvement.
- It is worth looking at the difference between the 'Your org' result and the benchmarking group 'Worst result'. The closer your organisation's result is to the worst result, the more concerning the result.
- Results where your organisation's result is only marginally better than the 'Average result', but still lags behind the 'Best result' by a notable margin, could also be considered as areas for further improvement.

Only one example is highlighted for each point

Positive outcomes

- Similarly, using the overview page it is easy to identify People Promise elements and themes which show a positive outcome for your organisation, where 'Your org' results are distinctly higher than the benchmarking group 'Average result'.
- Positive stories to report could be ones where your organisation approaches or matches the benchmarking group's 'Best result'.

Review trend data

Trend data can be used to identify measures which have been consistently improving for your organisation (i.e. showing an upward trend) over the past years and ones which have been declining over time. These charts can help establish if there is genuine change in the results (if the results are consistently improving or declining over time), or whether a change between years is just a minor year-on-year fluctuation.

Benchmarked trend data also allows you to review local changes and benchmark comparisons at the same time, allowing for various types of questions to be considered: e.g. how have the results for my organisation changed over time? Is my organisation improving faster than our peers?

Review the sub-scores and questions feeding into the People Promise elements and themes

In order to understand exactly which factors are driving your organisation’s People Promise element and theme results, you should review the sub-scores and questions feeding into these results. The **sub-score results** and the ‘**Question results**’ section contain the sub-scores and questions contributing to each People Promise element and theme, grouped together. By comparing ‘Your org’ results to the benchmarking group ‘Average’, ‘Best’ and ‘Worst’ results for each question, the **questions which are driving your organisation’s People Promise element and theme results can be identified**.

For areas of experience where results need improvement, action plans can be formulated to **focus on the questions where the organisation’s results fall between the benchmarking group average and worst results**. Remember to keep an eye out for questions where a lower percentage is a better outcome – such as questions on violence or harassment, bullying and abuse.

✗ = Negative driver, org result falls between average and worst benchmarking group result for question

This benchmark report displays results for all questions in the questionnaire, including benchmarked trend data wherever available. While this a key feature of the report, at first glance the amount of information contained on more than 140 pages might appear daunting. The below suggestions aim to provide some guidance on how to get started with navigating through this set of data.

Identifying questions of interest

➤ Pre-defined questions of interest – key questions for your organisation

Most organisations will have questions which have traditionally been a focus for them - questions which have been targeted with internal policies or programmes, or whose results are of heightened importance due to organisation values or because they are considered a proxy for key issues. Outcomes for these questions can be assessed on the backdrop of benchmark and historical trend data.

➤ Identifying questions of interest based on the results in this report

The methods recommended to review your People Promise and theme results can also be applied to pick out question level results of interest. However, **unlike People Promise elements, themes and sub-scores where a higher result always indicates a better result, it is important to keep an eye out for questions where a lower percentage relates to a better outcome** (see details on the 'Using the report' page in the 'Introduction' section).

- **To identify areas of concern:** look for questions where the organisation value falls between the benchmarking group average and the worst result, particularly questions where your organisation result is very close to the worst result. Review changes in the trend data to establish if there has been a decline or stagnation in results across multiple years but consider the context of how the organisation has performed in comparison to its benchmarking group over this period. A positive trend for a question that is still below the average result can be seen as good progress to build on further in the future.
- **When looking for positive outcomes:** search for results where your organisation is closest to the benchmarking group best result (but remember to consider results for previous years), or ones where there is a clear trend of continued improvement over multiple years.

Appendix D: Socio-economic background

Starting in 2025, the online NHS Staff Survey includes questions on staff members' socio-economic background. The questionnaire included questions (Q33-37) from the [Socio-economic background harmonised standard](#) from the Government Statistical Service (GSS) Harmonisation Team.

What is socio-economic background?

The [Socio-economic background harmonised standard](#) uses the [Social Mobility Commission's definition](#) of socio-economic background, which is:

"[...] the particular set of social and economic circumstances that an individual has come from. It permits objective discussion of the influence of these circumstances on individuals' educational and career trajectories; and it can be objectively measured by capturing information on parental occupation and level of education."

Measuring socio-economic background

The NHS Staff Survey used the self-coded question set designed to place respondents into five classes, the [Five Class System of National Statistics Socio-economic Classification \(NS-SEC\)](#). During quality assurance processes, analysts at the Survey Coordination Centre (SCC) identified a high rate of non-response or non-substantive responses, resulting in 48.02% of respondents from across the country not being allocated a score with the Five Class System. This includes 4.85% that said their parents/guardians were not employed. Using an alternative Three Class System (that is derived only using Q37 - *When you were aged about 14, what was the occupation of the main or highest income earner?*) reduced the proportion without a score to 28.32%.

SCC also found the rate of responses not resulting in a score varied between demographic groups. This occurs with both the Five and Three Class Systems, though to lesser extent for the Three Class System. Groups less likely to produce a score include:

- People from **Mixed / multiple, Asian / Asian British, Black / African / Caribbean / Black British, Arab** or **Other** ethnic backgrounds (as compared to people from **White** backgrounds)
- **Younger people** (particularly those aged 16-30)
- People **recruited from abroad**

National results are shown in more detail on the following page.

Comparison of Three and Five Class approaches
