

About UKTIS:

- UKTIS is national service funded by the UK Health Security Agency and hosted by Newcastle upon Tyne Hospitals NHS Foundation Trust.
- Our service is funded to monitor known and emerging human teratogens in the UK and to communicate the risks which may be associated with exposure to teratogens.
- Our work mainly focusses on monitoring the safety of medicines and communicating the risks and benefits around medication in pregnancy.
- We operate an information helpline (**0344 892 0909** – available 9am to 5pm Monday through Friday excluding bank holidays) and information websites for healthcare professionals (www.uktis.org) and patients (www.medicinesinpregnancy.org).
