21 November 2025

Dear Russell,

Crossrail Central Operating Section Network Statement, 2027

I am writing to conclude ORR's review of the latest Crossrail Central Operating Section Network Statement, as required of us under *The Railways (Access, Management and Licensing of Railway Undertakings) Regulations 2016* ("the 2016 Regulations").

We commented on your consultation version, on which you consulted between September and October 2025, and have reviewed your *Network Statement 2027*, published in November 2025. Thank you for your engagement on the consultation version and we note in particular your responses to our comments and the changes made reflecting them in your *2027 Network Statement*.

Our conclusion of this review should not be seen as an endorsement of TfL's position as set out in the Network Statement regarding any future application to changes to the CCOS Interim Charging Framework.

We look forward to engagement on your 2028 Network Statement next year. In line with our commitment to transparency, we will place a copy of this letter on the [Network statements](#) section of our website.

Yours sincerely

[REDACTED]
David Reed
